

WAR GRIFFONS TITAN LEGION ARMY LIST

Forces

The War Griffons Titan Legion Army List uses the datasheets from the Adeptus Mechanicus Titan Legion Forces section, the Imperial Navy Forces section.

Using The Army List

The following army list allows you to field an army based on one of the War Griffons Titan Legion. It can also be used as a “stand in” army list for other Titan Legions as well.

War Griffons Titan Legion formations come in three types: battle titans, scout titans and support formations. Each battle titan you include in the army allows you to field any two scout titan formations. Each battle titan or scout titan formation allows you to field any one support formation. Although you can only take a scout titan or support formation if you first take a battle titan formation, they are treated as separate independent formations during a battle and do not have to move around together.

In addition, certain formations may be given upgrades. Which upgrades a formation may be given are listed in the “upgrades” column. Upgrades are added to the formation and are not a separate formation. Each upgrade that is taken adds to the cost of the formation, as shown on the upgrade chart. **Note:** the upgrades chosen can lead to an additional surcharge (see War Griffons Epic Tournament Special Rules).

SPECIAL RULE

God Machines

All War Griffons Titan Legion formations with a unit with a line of fire to a Scout or Battle Titan formation that has been destroyed receive a Blast marker.

SPECIAL RULE

War Griffons Epic Tournament Special Rules

All *Weapon Mounts* in a Scout or Battle Titan formation must be mounted with a weapon. In addition, each Scout or Battle Titan formation must select at least two different weapons or pay a surcharge of an additional +25 points.

WAR GRIFFONS TITAN LEGION ARMY LIST

War Griffons Titan Legion armies have a strategy rating of 3. Battle and Scout Titan formations have an initiative rating of 1+. All other formations have an initiative rating of 2+.

SPECIAL RULE

Automaton

A formation does not receive a Blast marker when a unit with automaton is destroyed, this includes the extra Blast marker from the first casualty of a crossfire and for units destroyed for being out of formation after a move. Automaton units hit by a weapon with disrupt **do** take a Blast marker however.

If a hit is inflicted on an automaton unit because it is in a broken formation which is receiving a Blast marker (see *Blast Markers and Broken Formations*) then it may attempt to save normally.

Automaton units killed in an assault count for the purposes of working out its result (see *Work Out Result*).

SPECIAL RULE

Weapon Mount

Weapon Mounts are areas on a unit that may be fitted with weapon systems. When a weapon mount is mounted with a weapon (a “character” unit) it gains all the abilities and special rules of the weapon while retaining any of its own. A weapon mount may only be mounted with one weapon.

SPECIAL RULE

*Imperial Void Shields*¹

Imperial Titans are protected by void shield generators. The number of void shields each Titan has is noted on the Titan's datasheet.

Each void shield will automatically stop one point of damage and then go down. Do not make armour saves for damage stopped by void shields, nor allocate Blast markers. Once all of the shields have been knocked down, the Titan may be damaged normally and you may make saving throws against any hits that are scored. Hits from close combat ignore void shields but units using their firefight values must first knock down any shields before they can damage the Titan.

Void shields that have been knocked down can be repaired. Each Titan can repair one downed void shield in the end phase of each turn. In addition, if a Titan regroups it can use the dice roll to either repair the void shield or remove Blast markers (e.g., if you rolled a 2 you could repair 2 shields, remove 2 Blast markers or repair 1 shield and remove 1 Blast marker).

1. Imperial Void Shields

Q: Do void shields stop a point of damage caused by: a failed dangerous terrain test, the extra hits from the result of an assault, a Blast marker on a broken formation, or the unit ending its second withdrawal move within 15cm of the enemy?

A: No.

Q: How many void shields go down if a war engine is hit by a *Titan Killer* weapon that causes multiple points of damage?

A: One per each point of damage, with any left over being allocated to the unit.

Q: Can a formation regroup to repair downed void shields if it has no Blast markers?

A: Yes.

Q: If a formation with multiple units with void shields regroups is the number of repaired void shields the same for each unit or shared between them?

A: Shared between them, e.g. if you chose to repair two void shields, one unit could repair two void shields or two units could repair one void shield each.

Q: Are void shields considered when determining how many hits a war engine should be allocated?

A: No.
