CODEX ASTARTES SPACE MARINE ARMY LIST

"The Codex Astartes is the holy tome of these loyal Battle Brothers. The wisdom of the ancients is both scripture and the unbending rod by which they are measured. In war, they are fierce and as steadfast as those of old who stood beside the Emperor and broke the Legions of Horus. In faith and valour they are unmatched. The torches of their chapels burn bright with flames whose holy fire has shone upon an unchanging brotherhood for a hundred centuries. In their lives and in war, the Codex Astartes is their guide."

Forces

The Codex Astartes Space Marine Army List uses the datasheets from the Space Marine Forces section, the Imperial Navy Forces section, and the Titan Legion Forces section.

Using The Army List

The following army list allows you to field an army based on one of the Space Marine Chapters that closely follows the teachings of the Codex Astartes. It can also be used as a "stand in" army list for other Space Marine Chapters that do not follow the Codex Astartes, such as the Blood Angels, Dark Angels and Space Wolves.

Space Marines are organised into small formations called *detachments*. Each detachment is made up of one or more units, and may also include a number of extra units called *upgrades*.

The detachments that may be taken in a Codex Astartes army are shown on the chart that follows. The chart also shows what units comprise the detachment, what upgrades are allowed, and its points cost. For example, an Assault detachment consists of four Space Marine Assault units for 175 points, and may include the Commander and Vindicator upgrades at an additional cost in points.

Each upgrade that is taken adds to the cost of the detachment, as shown on the *upgrade chart*. The upgrade chart also lists the units that make up the upgrade. Note that these will sometimes replace units in the detachment they are taken for, and sometimes takes the form of additional units for the detachment. Each upgrade may be taken once per formation. For example, an Assault detachment could include one Commander and one Vindicator. If both were taken it would cost 175 + 50 +75 = 300 points.

Codex Astartes armies may be supported by Imperial Navy aircraft, Titan Legion battlegroup and Codex Astartes aircraft formations. A maximum of up to a third of the points available to the army may be spent on these formations.

Special Rules

The *They Shall Know No Fear* rule applies to all Codex Astartes detachment formations (see *They Shall Know No Fear*).

SPECIAL RULE

Space Marine Transports [1]

The Space Marines are a highly mobile army. Because of this, the points cost of a detachment usually includes enough Rhino transport vehicles to transport it and any upgrades that have been taken. Determine the number of Rhinos needed after all upgrades have been purchased. The number of Rhinos will always be the minimum needed to carry the formation, you can't take extras along to cover any losses!

Note that many formations don't receive Rhinos, usually because they can't fit into them. Detachments that come with Rhinos will be noted as having "plus transport" in the units section of the army list opposite.

Also note that you don't have to take Rhinos if you don't want to. If you'd rather field the formation on foot instead, so it can act as a garrison for example, or be transported in a Thunderhawk Gunship, then you may do so.

In addition, you may choose to replace a detachment's Rhinos with Drop Pods. If you do this then the detachment will enter play in a Drop Pod using the rules for *Planetfall* (see Planetfall). Note that if you choose to do this you will also require at least one Space Marine Strike Cruiser or Battle Barge to deploy the drop pods from.

Before each game, after the opposing army is known but before objectives are placed, the Space Marine player may choose which formations with the "plus transport" aspect are deployed in Rhinos, Drop Pods or on foot. If the formation has any units unable to deploy in Drop Pods then that option cannot be selected.

1. Space Marine Transports

Q: If a formation comes with Rhinos, and can also take Land Raiders and Razorbacks via upgrades, how do you determine how many Rhinos the formation receives?

A: Add any Land Raiders to a formation first. Next, add any number of Razorbacks to the formation, up to the number required to transport those units not being transported in Land Raiders. Finally, the formation receives Rhinos to transport those units not being transported in Land Raiders or Razorbacks.

After the drop pod lands, its Deathwind attacks all enemy units within 15cm. Each enemy formation attacked receives a Blast marker for coming under fire, and an extra Blast marker for each casualty. Then any troops carried in the drop pod must disembark within 5cm of the drop pod or within 5cm of another unit from the same formation that has already landed, so long as all units are placed within 15cm of the drop pod. Drop pod models should be removed from the board once the formation they transport has disembarked.*

SPECIAL RULE

They Shall Know No Fear[2]

Space Marines are renowned for their tenacity and bravery. This is represented by the following rules:

- It takes 2 Blast markers to suppress a Space Marine unit or kill a unit in a broken formation (ignore any leftover Blast markers).
- Space Marine formations are only broken if they have 2 Blast markers per unit in the formation.
- Space Marines formations only count half their number of Blaster markers in assault resolution (rounding down—note that assault resolution will not receive +1 for having no Blast markers if the formation has 1 Blast marker before rounding down). Halve the number of extra hits suffered by a Space Marine formation that loses an assault, rounding down in favour of the Space Marines.
- When a broken Space Marine formation rallies, it receives a number of Blast markers equal to the number of units, rather than half this number. Space Marines with the Leader special ability remove 2 Blast markers instead of 1.

2. They Shall Know No Fear

Q: How many Blast markers does a broken Space Marine unit count as having when working out the result of an assault?

A: One per unit.

SPECIAL RULE

Imperial Void Shields[3]

Imperial Titans are protected by void shield generators. The number of void shields each Titan has is noted on the Titan's datasheet.

Each void shield will automatically stop one point of damage and then go down. Do not make armour saves for damage stopped by void shields, nor allocate Blast markers. Once all of the shields have been knocked down, the Titan may be damaged normally and you may make saving throws against any hits that are scored. Hits from close combat ignore void shields but units using their firefight values must first knock down any shields before they can damage the Titan.

Void shields that have been knocked down can be repaired. Each Titan can repair one downed void shield in the end phase of each turn. In addition, if a Titan regroups it can use the dice roll to either repair the void shield or remove Blast markers (e.g., if you rolled a 2 you could repair 2 shields, remove 2 Blast markers or repair 1 shield and remove 1 Blast marker).

3. Imperial Void Shields

Q: Do void shields stop a point of damage caused by: a failed dangerous terrain test, the extra hits from the result of an assault, a Blast marker on a broken formation, or the unit ending its second withdrawal move within 15cm of the enemy?

A: No.

Q: How many void shields go down if a war engine is hit by a Titan Killer weapon that causes multiple points of damage?

A: One per each point of damage, with any left over being allocated to the unit.

Q: Can a formation regroup to repair downed void shields if it has no Blast markers?

A: Yes.

Q: If a formation with multiple units with void shields regroups is the number of repaired void shields the same for each unit or shared between them?

A: Shared between them, e.g. if you chose to repair two void shields, one unit could repair two void shields or two units could repair one void shield each.

Q: Are void shields considered when determining how many hits a war engine should be allocated?

A: No.
